

## **Sadara Launches On-Job Training for Saudi Fresh Graduates**

**Jubail Industrial City, Saudi Arabia, Dec. 04, 2020 --** As part of its efforts to advance the qualification of young Saudi fresh graduates, Sadara Chemical Company (Sadara) has welcomed a number of Saudis who recently graduated from Jubail Industrial College and Jubail Technical Institute as trainees in various technical and engineering disciplines. The Saudi trainees will go through an On-the-Job Training (OJT) program that will continue for periods ranging from six months to a full training year. The training begins in December 2020 and will continue into 2021.

Sadara said that this specialized training aims to enhance the skills of young Saudi graduates in vital areas, including the chemical industries, operating skills in advanced industrial environments, and optimal handling of industrial tools and processes that ensure the highest levels of productivity related to the quality and efficiency of production.

Sadara added that the number of Saudi trainees totaled 40 from various industrial, technical and engineering specializations in the diploma programs, and that the company has adopted a training plan that qualifies these young Saudis to fulfill the requirements of the industrial labor market, including the need for high quality and considering the intense competitiveness of the market.

Sadara also affirmed its continued support for training programs for newly graduated Saudis, and its keenness to provide opportunities for the largest possible number of Saudi males and females by enrolling them in the OJT and other related programs, in coordination with all academic institutions in Jubail.

####

**About Sadara:**

*Sadara is a joint venture developed by the Saudi Arabian Oil Company (Saudi Aramco) and The Dow Chemical Company. Sadara is a multi-billion-dollar world-scale chemical complex in Jubail Industrial City II in Saudi Arabia's Eastern Province. Comprised of 26 world-scale manufacturing units, the Sadara chemical complex is the world's largest to be built in a single phase and is the only chemical company in the Middle East to use refinery liquids, such as naphtha and natural gasoline, as feedstock. By using best-in-class technologies to crack refinery liquid feedstock, Sadara will enable many industries that either currently do not exist in Saudi Arabia or only exist through imports of raw materials. The adjacent PlasChem Park, a unique collaboration between Sadara and the Royal Commission for Jubail and Yanbu', will create more value downstream, generating unprecedented investment, innovation, economic growth and thousands of jobs.*
