

## Sadara Achieves Certification as Responsible Care® Company

**JUBAIL, Kingdom of Saudi Arabia, 9 September 2019** – Sadara Chemical Company (Sadara) has successfully completed an external audit that qualifies it for RC14001:2015 certification as a Responsible Care® Company.

The audit, conducted by FAHSS/TÜV, the National Inspection and Technical Testing Company, local agent for TÜV Nord, was concluded this week in the final stage of the Responsible Care certification process under the umbrella of the Gulf Petrochemicals and Chemicals Association (GPCA).

Sadara is a signatory and active member of GPCA's Responsible Care Committee.

Sadara's CEO, Dr. Faisal M. Al-Faqeer, congratulated the entire Sadara team for the accomplishment, which he said "would not have been possible without an impressive level of teamwork and dedication, as well as full compliance with our Environment, Health, Safety & Security Standards."

The Responsible Care certificate merges ISO 14001 standards into the requirements of the Responsible Care Management System (RCMS), creating a single cost-effective system.

Responsible Care® is a global, voluntary initiative developed to drive continuous improvement and achieve excellence in environmental, health, safety and security performance in the chemical industry. Responsible Care is today practiced by more than 580 chemical companies in at least 65 countries around the world.

### **About Sadara:**

*Sadara is a joint venture developed by the Saudi Arabian Oil Company (Saudi Aramco) and The Dow Chemical Company. Sadara is a multi-billion-dollar world-scale chemical complex in Jubail Industrial City II in Saudi Arabia's Eastern Province. Comprised of 26 world-scale manufacturing units, the Sadara chemical complex is the world's largest to be built in a single phase and is the only chemical company in the Middle East to use refinery liquids, such as naphtha, as feedstock. By using best-in-class technologies to crack refinery liquid feedstock, Sadara enables many industries that either currently do not exist in Saudi Arabia or only exist through imports of raw materials. The adjacent PlasChem Park, a unique collaboration between Sadara and the Royal Commission for Jubail and Yanbu', will create more value downstream, generating unprecedented investment, innovation, economic growth and thousands of jobs.*
